

SIGHI Food Compatibility List / 食物兼容性清单

Source: 21_FoodList_EN_alphabetic_withCateg.pdf. Bilingual version generated on 2026-07-16. 中文为机器翻译加术语修正的学习/查阅稿；饮食和医疗决策请以英文原文及医生意见为准。

Legend / 图例

0	Well tolerated	通常耐受
1	Moderately compatible	中等兼容；少量偶尔食用通常可耐受
2	Incompatible	不兼容；常规摄入可能有明显症状
3	Very poorly tolerated	耐受性很差；可能有严重症状
H!	Highly perishable	高度易腐败，组胺快速形成
H	High histamine content	组胺含量高
A	Other biogenic amines	其他生物胺
L	Liberator	肥大细胞介质/组胺释放剂
B	Blocker	DAO 或其他组胺降解酶抑制剂
?	Insufficient or contradictory information	信息不足或矛盾

Introductory Notes / 前言说明译文整理

The original front matter uses a multi-column layout. This section provides a structured bilingual translation of the key instructions and cautions before the full bilingual food table.

Purpose / 用途

This list is intended for diagnostic and therapeutic elimination diets in histaminosis, including mast cell activation syndrome (MCAS), mastocytosis, and histamine intolerance.

本清单用于组胺相关疾病的诊断性和治疗性排除饮食，包括肥大细胞活化综合征 (MCAS)、肥大细胞增多症和组胺不耐受。

The source list is sorted alphabetically and grouped by category. The source file states an update date of 2023-04-01.

原清单按字母顺序排列，并按类别分组。源文件标注的更新日期为 2023-04-01。

Compatibility Scale / 兼容性等级

0 - Well tolerated; no symptoms expected at usual intake.

0 - 通常耐受；按常规摄入量预计不会出现症状。

1 - Moderately compatible; minor symptoms possible; occasional small quantities are often tolerated.

1 - 中等兼容；可能有轻微症状；少量、偶尔食用通常可耐受。

2 - Incompatible; significant symptoms may occur at usual intake.

2 - 不兼容；按常规摄入量可能出现明显症状。

3 - Very poorly tolerated; severe symptoms may occur.

3 - 耐受性很差；可能出现严重症状。

-- No general statement possible. ? - Insufficient or contradictory information.

-- 无法作出一般性判断。? - 信息不足或相互矛盾。

Mechanism Letters / 机制字母

H! - Highly perishable; histamine forms rapidly.

H! - 高度易腐败；组胺会快速形成。

H - High histamine content.

H - 组胺含量高。

A - Other biogenic amines.

A - 其他生物胺。

L - Liberators of mast cell mediators, also called histamine liberators.

L - 肥大细胞介质释放剂，也称组胺释放剂。

B - Blockers or inhibitors of diamine oxidase (DAO) or other histamine-degrading enzymes.

B - 二胺氧化酶 (DAO) 或其他组胺降解酶的阻断剂/抑制剂。

How To Read The Histamine Column / 如何理解“Histamine”列

The source emphasizes that the Histamine column does not simply show the histamine content of a food. It represents perceived compatibility for histamine-sensitive people.

原文强调，“Histamine”列并不是简单显示食物的组胺含量，而是表示组胺敏感人群对该食物的感知兼容性。

Compatibility can depend on histamine, other biogenic amines, mast cell mediator liberators, DAO inhibitors, food consistency, freshness, and possibly mast-cell-stabilizing or histamine-lowering ingredients.

兼容性可能受组胺、其他生物胺、肥大细胞介质释放剂、DAO 抑制剂、食物质地、新鲜度，以及可能稳定肥大细胞或降低组胺的成分影响。

For protein-rich perishable foods, freshness is especially important.
对于富含蛋白质且易腐败的食物，新鲜度尤其重要。

Individual Tolerance / 个体耐受

The transition between tolerable and intolerable is fluid and dose-dependent for some intolerances, including histaminosis, lactose intolerance, and fructose intolerance.
对于部分不耐受情况（包括组胺相关疾病、乳糖不耐受和果糖不耐受），可耐受与不可耐受之间并非绝对界线，而是具有剂量依赖性。

Severity varies greatly between people and can also depend on the current condition of the day.
严重程度在个体之间差异很大，也会受到当天身体状态影响。

Salicylates naturally present in plants are not included in the Histamine column, although they may be relevant for some MCAS sufferers.
植物中天然存在的水杨酸盐未计入“Histamine”列，尽管它们可能对部分 MCAS 患者很重要。

Compound Products / 复合食品

For meals or products made from several ingredients, check the ingredient list carefully. If every ingredient is compatible and the product is not fermented or microbially matured, the product is usually compatible when sufficiently fresh.
对于由多种成分组成的餐食或产品，应仔细查看配料表。如果所有成分都兼容，且产品没有发酵或微生物熟成，在足够新鲜时通常也可视为兼容。

If not all ingredients are compatible, either treat the product as incompatible as a precaution or test personal tolerance carefully.
如果并非所有成分都兼容，应谨慎地将该产品视为不兼容，或在个人耐受范围内小心测试。

Additives can appear in basic foods where they are not expected; the ratings apply to pure foods without further additives.
添加剂可能出现在看似基础的食物中；清单评级只适用于不含额外添加剂的纯食物。

Dietary Use / 饮食使用

The source states that this list alone is not sufficient dietary guidance and refers readers to the SIGHI websites for detailed instructions and supplemental information.
原文说明，仅凭本清单不足以构成完整饮食指导；详细说明和补充信息应参考 SIGHI 网站。

During the initial phase, the list can guide food selection. After roughly 4-6 weeks, users are advised to gradually test what they personally tolerate and in what quantities.
在饮食调整初期，本清单可作为选择食物的指南。约 4-6 周后，建议逐步测试自己能耐受哪些食物及其剂量。

In the long term, the source recommends relying on personal experience rather than any list alone.
长期来看，原文建议不要只依赖任何清单，而应结合自己的实际经验。

Other Triggers And Variability / 其他诱因与波动

Food is not the only possible trigger. Menstrual cycle, stress, emotions, exertion, infections, weather, medications, fragrances, cosmetics, detergents, tobacco smoke, pesticide residues, air pollution, and other environmental toxins may also matter.
食物并不是唯一可能诱因。月经周期、压力、情绪、体力消耗、感染、天气、药物、香精、化妆品、清洁剂、烟草烟雾、农药残留、空气污染和其他环境毒素也可能相关。

Products such as wine, cheese, fish, and meat preparations can vary greatly by variety, manufacturer, batch, and storage time.
葡萄酒、奶酪、鱼类和肉类制品等产品，会因品种、厂家、批次和储存时间不同而有很大差异。

References, Disclaimer, Copyright / 依据、免责声明、版权

The source says tolerability assessments combine patient experience, patient organizations, self-help groups, clinical food lists, scientific literature, and books on histamine intolerance.
原文说明，耐受性评估综合了患者经验、患者组织、自助小组、临床食物清单、科学文献和组胺不耐受相关书籍等来源。

The list is not exhaustive, contains uncertainties, and is updated periodically. It cannot replace a doctor's visit and is used at the reader's own risk.
本清单并非穷尽，存在不确定性，并会定期更新。它不能替代就医，使用者需自行承担风险。

The source permits free reproduction and distribution of the unmodified version, while commercial use requires written permission from the author.
原文允许免费复制和传播未经修改的版本；商业使用需获得作者书面许可。

Food List / 食物清单

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
ytilibitapmoC					Ingredients 成分	Remarks 备注
					imal Eggs 伊玛尔蛋	
2			L		egg white 蛋清	Mast cell activating especially raw, but even cooked 尤其生食时会活化肥大细胞；即使煮熟也可能有影响。
0					egg yolk 蛋黄	
2			L		eggs, chicken egg, whole egg 鸡蛋、全蛋	Yolk is compatible. Egg white is mast cell activating especially raw, but even cooked. 蛋黄兼容；蛋清尤其生食时会活化肥大细胞，即使煮熟也可能有影响。
0					quail eggs 鹌鹑蛋	
0					quail's egg 鹌鹑蛋	
					Dairy 奶制品	
2	H	A	?		blue cheeses, mold cheeses 蓝纹奶酪、霉菌奶酪	
1	H	A			Butter: cultured butter, mildly soured butter 发酵黄油、微酸黄油	May contain small amounts of histamine. Usually well tolerated. 可能含有少量组胺；通常耐受良好。
0					butter: sweet cream butter 甜奶油黄油	Sweet cream butter is the normal butter, not fermented with bacteria. 甜奶油黄油是普通黄油，不经细菌发酵。
0					Butterkaese 黄油	
1	H				buttermilk (slightly sour, starting to ferment) 酪乳 (微酸、开始发酵)	Lactic acid fermentation 乳酸发酵。
2	H	A			cheddar cheese 切达奶酪	
2	H	A			cheese made from unpasteurised "raw" milk 奶酪是用"生"奶做的	Depending on hygiene. Higher risk than for cheese made from pasteurized milk 取决于卫生条件；风险高于巴氏杀菌奶制成的奶酪。
3	H	A			cheese: hard cheese, all well matured cheeses 奶酪:坚硬的奶酪,所有成熟的奶酪	
0					cream cheeses (means: very young cheeses), plain, without additives 奶油奶酪 (即很年轻的奶酪)，原味，不含添加剂	
0					cream, sweet, without additives 甜奶油，不含添加剂	Tolerated if unfermented. Always check for additives. Mostly contains intolerated thickeners or stabilizers, e.g. E407, E410! 未发酵时可耐受。务必检查添加剂；常含不耐受的增稠剂或稳定剂，如 E407、E410！
0					curd cheese 凝乳干酪	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0			?		ewe's milk, sheep's milk 母羊奶、绵羊奶	
0					farmer's cheese (a type of fresh cheese) 农民奶酪(一种新鲜奶酪)	
1	H	A			Feta cheese 菲达奶酪	
2	H	A			Fontina cheese 丰蒂纳奶酪	
0					Geheimratskaese, Geheimrats cheese 盖海姆拉特斯开士	
0			?		goat's milk, goat milk 山羊奶	
0					Gouda cheese (young) 年轻高达奶酪	Eat small quantities only. 仅少量食用。
2					Gouda cheese, old 陈年高达奶酪	
1	H	A			kefir, keefir, kephir 开菲尔	
0					Mascarpone cheese 马斯卡蓬奶酪	
1	H		?		milk, lactosefree 无乳糖牛奶	Sometimes well tolerated, sometimes slightly worse tolerated than regular milk. 有时耐受良好，有时比普通牛奶略难耐受。
0			?		milk, pasteurised 巴氏杀菌奶	Milk may be incompatible, as long as the bowel is still irritated. 只要肠道仍处于刺激状态，牛奶可能不兼容。
0			?		milk, UHT 超高温灭菌奶	UHT = ultra-high temperature processing, ultra-heat treatment UHT = 超高温处理。
1	?		?		milkpowder 奶粉	Sometimes well tolerated, sometimes not. 有时耐受良好，有时不耐受。
2	H	A	?		mold cheeses, mould cheeses 霉菌奶酪、霉菌奶酪	
0					Mozzarella cheese 马苏里拉奶酪	
2	H	A			processed cheese 加工奶酪	
2	H	A			products made from unprocessed (raw) milk 由未加工(生)奶制成的产品	
0					quark 夸克	
2	H	A			Raclette cheese 拉克莱特奶酪	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0	H!	?	?		raw milk 生牛奶	Perishable due to higher bacterial count. Use only fresh. 因细菌数较高而易腐败；只使用新鲜品。
2	?	?	?		ready made cheese preparations (with other/further ingredients) 制成的奶酪制剂(加上其他/进一步成分)	Depending on the ingredients and freshness 取决于成分和新鲜度。
0					Ricotta cheese 龙卷风奶酪	
2	H	A			Rocheport cheese 罗什福尔奶酪	
2	H	A			Roquefort cheese 罗克福芝士	
0			?		sheep's milk, sheep milk 羊奶,羊奶,羊奶,羊奶,羊奶,羊奶	
1	H				sourcream 酸奶酱	Lactic acid fermentation! Slightly histamine containing 乳酸发酵！含有少量组胺。
0					whey 嘘	
1	H	?			yoghurt (natural yoghurt) 酸奶 (原味酸奶)	Varies by product 因产品而异。
					Meat 肉类	
0	H!				beef (fresh) 牛肉 (新鲜)	
0	H!				chicken 鸡肉	
3	H	A	?		dried meat (any kind) 干肉(任何种类)	
3	H	A	?		dry-cured ham 干烧火腿	
0	H!				duck 鸭肉	
2	H!		L		entrails 内脏	
1	H	?			game 游戏	Mostly matured meat, but fresh wild boar is well tolerated. 多为熟成肉；但新鲜野猪肉通常耐受良好。
3	H	A	?		ham (dried, cured) 火腿(干燥,治愈)	
2	H!		L		innards 内纳	
0					minced meat (if eaten immediately after its production) 薄荷肉(如果生产后立即食用)	Strongly depends on the freshness 高度取决于新鲜程度。

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
2	H	A			minced meat (open sale or pre-packed) 薄肉(公开销售或预包装)	Strongly depends on the freshness 高度取决于新鲜程度。
0	H!				ostrich 鸟类	
1	H!		?		pork (fresh and untreated) 猪肉 (新鲜、未经处理)	Controversial. Mostly well tolerated but very perishable. Histamine liberator -> itching? 存在争议。通常耐受良好，但非常易腐败。可能作为组胺释放剂导致瘙痒？
0	H!				poultry meat 家禽肉类	
0	H!				quail 鹌鹑	
3	H	A	?		salami 香肠	
3	H	?	?		sausages of all kinds 各种香肠	A few acceptable exceptions are possible. 可能存在少数可接受的例外。
3	H	?	?		smoked fish (any) 烟鱼(任何)	
3	H	?	?		smoked meat (any) 烟肉(任何)	
0					tongue (veal, beef) 舌头(牛肉、牛肉)	Check for intolerated ingredients if processed ready to eat. No smoked products. 若为即食加工品，请检查是否含不耐受成分。不要选择烟熏制品。
0	H!				turkey 火鸡肉	
0	H!				veal (fresh) 小牛肉 (新鲜)	
1	H	?			venison 动物	Mostly matured meat, but fresh wild boar is well tolerated. 多为熟成肉；但新鲜野猪肉通常耐受良好。
1	H	?			wild meat 野生肉类	Mostly matured meat, but fresh wild boar is well tolerated. 多为熟成肉；但新鲜野猪肉通常耐受良好。
					Fish 鱼	
3	H	A			anchovies 凤尾鱼	
0	H!	A			fish (freshly caught or frozen) 鱼 (刚捕获或冷冻)	Extremely depending on freshness and species 极大程度取决于新鲜度和鱼种。
3	H!	A			fish (in the shop in the cooling rack or on ice) 鱼(在冷却架的商店或冰上)	Extremely depending on freshness and species 极大程度取决于新鲜度和鱼种。
0	H!				trout (freshwater): brown trout, brook trout, rainbow trout 鳟鱼(淡水):棕鳟鱼、溪鳟鱼、虹鳟鱼	Perishable. Rapid histamine formation. 易腐败，会快速形成组胺。
3	H	A			tuna 金枪鱼	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
					Sea fo Sea	
2	H!		L		bivalves (mussels, oysters, clams, scallops, ...) 双val(贻贝, o, 蛤, 扇贝, ..	
2	H!		L		crab 蟹	
2	H!		L		crab 蟹	
2	H!		L		crawfish 小龙虾	
2	H!		L		crayfish 蜡笔鱼	
2	H!		L		langouste 恶言	
2	H!		L		lobster 龙虾	
2	H!		L		oysters 牡蛎	
2	H!		L		prawn 对虾	
2	H!		L		rock lobsters 岩龙虾	
2	H!		L		seafood, sea food 海产食品、海产食品	
2	H!		L		shellfish 贝类	(e.g. mussels, oysters, crab, lobster, shrimp) (例如贻贝、牡蛎、蟹、龙虾、虾)
2	H!		L		shrimp 虾	
2	H!		L		spiny lobsters 刺刺龙虾	
					Misce 雾	
0					lard 猪油	
					getab Starc 盖阿布·斯塔克	
0					amaranth, Amaranthus 苋属籽粒、苋米	May cause diarrhea in some cases. This entry refers to the pseudo grain called amaranth, (plant genus Amaranthus). Not to be confused with the azo dye amaranth (an artificial food coloring). 某些情况下可能导致腹泻。本条指称为苋米的伪谷物 (苋属植物) , 不要与偶氮染料苋菜红 (一种人工食用色素) 混淆。

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
1	?				baked goods 烤货	Problems are often caused by: malt, iodine, long fermentation times of yeast or sourdough, possibly also ATI grains (certain varieties with amylase-tryptase- inhibitors, undeclared) 问题常由以下因素引起：麦芽、碘、酵母或面团长时间发酵，也可能与 ATI 谷物有关（某些含淀粉酶-胰蛋白酶抑制剂的品种，通常未标注）。
1					barley 大麦	
2	?	?	?		barley malt, malt 大麦麦芽, 麦芽	
1	?				bread 面包	Problematic ingredients: malt, iodine, long fermentation times of yeast or sourdough, possibly also ATI grains (certain varieties with amylase-tryptase- inhibitors, undeclared) 问题成分：麦芽、碘、酵母或面团长时间发酵，也可能包括 ATI 谷物（某些含淀粉酶-胰蛋白酶抑制剂的品种，通常未标注）。
2		?	?		buckwheat 荞麦	Only incompatible, if not thoroughly peeled? 只有在未彻底去皮时才不兼容？
0					chestnut, sweet chestnut 栗子、甜栗	
0			!		cornflakes (if no additives such as malt or folic acid) 玉米片（无麦芽或叶酸等添加剂）	Be careful with malt, folic acid 注意麦芽和叶酸。
0					hemp seeds (Cannabis sativa) 大麻种子(Cannabis sativa)	The legal non-psychoactive subspecies 合法的非精神活性亚种。
0					KAMUT®, Khorasan wheat 卡穆特, 呼罗珊小麦	Prefer old varieties (e.g. KAMUT®). Modern ATI-varieties modified by cultivation are often not well tolerated. 优先选择古老品种（如 KAMUT®）。现代育种改良的 ATI 品种通常耐受性较差。
0					Khorasan wheat or Oriental wheat (Triticum turgidum ssp. turanicum), KAMUT® 霍拉桑小麦或东方小麦(Triticum turgidum ssp. turanicum), KAMUT®	Prefer old varieties (e.g. KAMUT®). Modern ATI-varieties modified by cultivation are often not well tolerated. 优先选择古老品种（如 KAMUT®）。现代育种改良的 ATI 品种通常耐受性较差。
2	?	?	?		malt, barley malt 大麦麦芽	
0					maltodextrin 马氏剂	
0					millet 小米	
0					oats 燕麦	Some varieties may sometimes be intolerated (flatulence). 某些品种有时可能不耐受（胀气）。
0					pearl sago 珍珠酱	
0					potato with peel 土豆带皮	Dark place! Green points are poisonous! Possibly incompatible for those with salicylate intolerance 避光保存！发绿部位有毒！对水杨酸盐不耐受者可能不兼容。
0					potato, new, with peel 土豆, 新, 带皮	Dark place! Green points are poisonous! Possibly incompatible for those with salicylate intolerance 避光保存！发绿部位有毒！对水杨酸盐不耐受者可能不兼容。
0					potato, peeled 土豆, 剥皮	Dark place! Green points are poisonous! 避光保存！发绿部位有毒！

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0					quinoa 藜	Possibly not always well tolerated? 可能并非总是耐受良好？
0					rice 米	After cooking, store in the fridge up to 12-24 hours max. 烹饪后冷藏保存最多 12-24 小时。
0					rice biscuits, rice cakes 大米饼干,大米蛋糕	Slightly worse tolerated than freshly cooked rice 耐受性略低于刚煮好的米饭。
0					rice crispies 大米脆饼	Be careful with malt, folic acid 注意麦芽和叶酸。
0					rice noodles 饭面	Slightly worse tolerated than freshly cooked rice 耐受性略低于刚煮好的米饭。
1					rye 黑麦	Barely tolerated 几乎不耐受。
0					sago 萨果	
0			?		spelt 斯佩尔特小麦	Prefer old varieties. Modern ATI-varieties modified by cultivation are often not well tolerated. 优先选择古老品种。现代育种改良的 ATI 品种通常耐受性较差。
2			L		sunflower seeds 向日葵种子	
0					sweet corn, maize kernels: corn on the cob, fresh / pasteurised 甜玉米、玉米内核:旱桶上的玉米,新鲜/	Hard to digest. 较难消化。
0					sweet corn, maize kernels: dried (maize meal, maize flour) 甜玉米、玉米内核:干(玉米面粉)	
0					sweet corn, maize kernels: out of the tin 甜玉米,玉米内核:出锡	Hard to digest. Possibly incompatible after long-term storage or in large quantities? 较难消化。长期储存后或大量摄入时可能不兼容？
0					sweet potato 甜马铃薯	
1	?		?		wheat 小麦	Uneven. Mostly digestive problems like flatulence. 个体差异较大；多为胀气等消化问题。
2		A	L		wheat germ 小麦菌	Putrescine, spermine, spermidine, cadaverine 腐胺、精胺、亚精胺、尸胺。
0					wild rice 野米饭	Wild rice is not botanically related to rice. 野米与大米没有植物关系。
0					yam 扬	
					Nuts 坚果	
1					almond 杏仁	Small amounts are well tolerated. May cause e.g. sleep problems. 少量是完全耐受的,可能会造成睡眠问题。
0					Brazil nut 巴西坚果	Max. 1-2 nuts per day are a good source of selenium 最大每天1-2个坚果是硒的好来源

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
1		A	L		cashew nut 腰果坚果	
0					chufa sedge (Cyperus esculentus) chu(Cyperus esculentus)为chu科 属下的一个种.	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
2			?		chufa sedge (Cyperus esculentus), roasted 烤焦的树枝	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
0					earth almond 土杏仁	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
1			L		hazelnut 榛子	
0					macadamia 母亲	
0					nut grass 坚果草	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
3					nuts 坚果	Uneven. See individual species. 不均匀,见个别物种。
2					peanuts 花生酱	
1			?		pine nuts 松坚果	Several species. Maybe not all of them with the same compatibility? 有几个物种,也许不是全部都具有相同的兼容性?
0					pistachio 开心果	
0					tiger nut sedge 老虎螺丝	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
3		A	L		walnut 核桃	
0					yellow nutsedge 黄坚果	Actually not a nut, but tuber (thickening of stolons) 严格说不是坚果，而是块茎（匍匐茎膨大部分）。
					Fats a 脂肪 a	
0					black caraway oil (Nigella sativa) 黑色汽车油(Nigella sativa)	antiallergic 抗过敏
0					canola oil 卡诺拉油	
0					coconut fat, coconut oil, copra oil 椰子脂肪、椰子油、椰子油	Very recommended 非常推荐
0					fennel flower oil (Nigella sativa) 芬内尔花油(Nigella sativa)	antiallergic 抗过敏
0					margarine (check for intolerated additives) 黄油(检查耐用添加剂)	Check for incompatible additives 检查不兼容添加剂

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0					Nigella sativa oil 奈杰拉·萨蒂瓦油	antiallergic 抗过敏
0					nutmeg flower oil (Nigella sativa) 坚果花油(Nigella sativa)	antiallergic 抗过敏
0					olive oil 橄榄油	Incompatible for those with salicylate intolerance 对水杨酸盐不耐受者不兼容。
0					palm kernel oil 棕榈内核油	Should not be bought for ecological reasons. Apart from that, it is recommended. 出于生态原因不建议购买；除此之外，该食物本身是推荐的。
0					palm oil, dendê oil 棕榈油、干油	Should not be bought for ecological reasons. Apart from that, it is recommended. 出于生态原因不建议购买；除此之外，该食物本身是推荐的。
0					pumpkin seed oil 南瓜种子油	This oil is made by pressing roasted, hulled pumpkin seeds (pepitas), from a local variety of pumpkin, the Styrian oil pumpkin. 这种油是由按压烤制的,壳状的南瓜种子(pepitas)制成的,来自当地的多种南瓜,即斯蒂利亚油南瓜。
0					rape seed oil 强奸种子油	
0					Roman coriander oil (Nigella sativa) 罗马科里安德油(Nigella sativa)	antiallergic 抗过敏
0					safflower oil 红花油	
1					sunflower oil 葵花籽油	A single dose is no problem, but is inflammatory in the long term. 单剂量是没有问题的,但长期来说是煽动性的。
2			?		walnut oil 核桃油	
					Veget 植物	
0					artichoke 洋蓟	
0					asparagus 芦笋	
2	H	?	?	?	aubergine 欧文	
2	H		L		avocado 鳄梨	
?					bamboo shoots 竹子射击	
2			L		beans (pulses) 豆类(脉冲)	Applies to virtually all types / varieties. Some tolerated exceptions are possible in some cases. 适用于几乎所有类型/品种,在某些情况下可以允许一些例外。
0					beetroot 甜菜根	
2					bell pepper (hot) 铃椒(热)	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0					bell pepper (sweet) 铃椒(甜)	
0					bok choy k	
2					borlotti beans 波罗提豆	
2	H	?	?	?	brinjal 布林贾尔	
0					broccoli 西兰花	
1			L		brussels sprouts 布鲁斯芽	
0					cabbage, green or white 小白菜,绿色或白色	
0					cabbage (excepting coliflower and kohlrabi) 出租车包(科利花和科拉比除外)	
0					carrot 胡萝卜	
0					cauliflower 菜叶花	
0					celery 芹菜	
0					celery cabbage (Brassica rapa subsp. pekinensis) 芹菜(学名:Brassica rapa subsp. pekinensis)为茜草科芹菜属下的一个种.	
1			?		chard stalks (Beta vulgaris subsp. vulgaris) 粗粗粗粗的细茎	
?					chayote 蓝宝石	Possibly not well tolerated. 可能耐受性不佳。
2					chickpeas 小鸡豆	
0					chicory (Cichorium intybus) 鸡尾酒(Cichorium intybus)	
2			?		chili pepper, red, fresh 辣椒,红色,新鲜的	Hotness is irritating 热是刺激
?					choko cho子	Possibly not well tolerated. 可能耐受性不佳。
0					corn salad, lamb's lettuce (Valerianella locusta) 玉米沙拉,羊肉生菜(Valerianella蝗虫)	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0					courgette 外观	
?			?		cress: garden cress (Lepidium sativum) 装潢:园林装潢	
0					cucumber 黄瓜	
2	H	?	?	?	eggplant 茄子	
0					endive (Cichorium endivia) 止痛药(Cichorium 止痛药)	
0					fennel 芬内尔	
?			?		garden cress (Lepidium sativum) 园林服饰(Lepidium sitivum)	
1					garlic 大蒜	In small amounts, usually well tolerated after cooking 少量的 通常在做饭后会被耐受
1					German turnip 德国萝卜	
0					gourds 瓜类	
1					green beans 绿豆	Can be well tolerated in some cases 在某些情况下是可以耐受的
1					green peas 绿色豌豆	
1					green split peas 绿色分裂的豌豆	
1			L		horseradish 马铃薯	
2			L		kelp (large seaweeds (algae) belonging to the brown algae) 海藻(棕藻属大海藻).	e.g. as an ingredient in seasoned salt / herbal salt 例如,作为成熟盐/草盐的成分
1					kohlrabi 科尔拉比	
0					lamb's lettuce, corn salad (Valerianella locusta) 羊肉生菜、玉米沙拉(Valerianella蝗虫)	
1			?		leek 莱克	In small amounts, usually well tolerated 少量的,通常会耐受的
2					lentils 扁豆类	
0					lettuce iceberg 结冰山	

Score 评分	H	A	L	B	Ingredient / 食材	Remarks / 备注
0					lettuce: head and leaf lettuces 生菜:头叶生菜	Rating applies to the plant without dressing 对植物进行不敷料的评分
0					marrow 髓	
?					mungbeans (germinated, sprouting) m豆(变种,增生)	
0					napa cabbage 纳帕小白菜	
2	?	?			olives 橄榄	Usually fermented, sometimes with intolerated ingredients 通常发酵,有时带有耐用成分
1			L		onion 洋葱	Incompatible in large quantities 大量摄入时不兼容。
0					pak choi ak	
0					parsnip 剖析	
2			L		perennial wall-rocket (Diplotaxis tenuifolia) 常年墙壁火箭	
3	H				pickled cabbage 腌白菜	
2	H	?			pickled cucumber 腌黄瓜
